PROFFESIONAL SUMMARY

Results-driven Full Stack Developer with **2.5 years of experience** in building responsive web applications using **React.js, Node.js, FastAPI, Python, MySQL, and React Native**. Experienced in developing scalable applications, RESTful APIs, and cloud-based solutions with a focus on performance, security, and clean code. Passionate about delivering high-quality software and continuously learning modern technologies.

WORK EXPERIENCE

- **Full Stack Developer, Aidas Technologies India Private Limited| Coimbatore** **Jan 2026 – Present**
 - Developed frontend and backend features for multiple platform modules.
 - Designed and implemented REST APIs using FastAPI.
 - Worked Role-Based Access Control (RBAC) and tenant onboarding workflow.
 - Implemented timezone handling across the application.
 - Designed database schemas and optimized SQL queries.
 - Created technical documentation and workflow diagrams.
 - Supported QA test case design and development, aligning test scenarios with business and functional requirements.
- **Software Engineer, Axcen Innovation Lab Private Limited | Trichy** **Oct 2023 – Dec 2025**
 - Enhanced responsive web applications using React.js, Node.js, and MySQL, adhering to industry best practices.
 - Built and maintained RESTful APIs, improving data exchange between front-end and back-end systems.
 - Managed code versioning and team collaboration using GitHub.
 - Deployed and maintained web applications on the Azure cloud platform.
 - Conducted performance testing with JMeter to identify and address bottlenecks, optimizing application performance.
 - Enhanced user experience by implementing modern UI/UX features with HTML5, CSS3, and JavaScript.

PROJECTS

- **Aidas HR Intranet Platform | ReactJS, Typescript, Vite, FastAPI, Microsoft Graph API**
 - Developed a secure, enterprise HR Intranet application integrated with Microsoft 365 to streamline employee self-service, work-from-home attendance tracking, announcements, and organizational communication.
 - Implemented a Role-Based Access Control (RBAC) system with Microsoft Entra ID authentication to provide secure, role-specific access for admin, publisher, and viewer users.
 - Build responsive dashboard, working hours analytics, interactive reports, and SharePoint-driven content management using React, Typescript, FastAPI, and Microsoft Graph API.
 - Designed scalable REST APIs, integrated SharePoint Lists and Document Libraries as the primary data source and implemented data export feature (Excel/PDF), modern responsive UI.

- **Aidas Intelligence Platform | ReactJS, Vite, Python, FastAPI, MySQL, AWS S3, SQLAlchemy**
 - Designed and developed an enterprise-grade multi-tenant AI & analytics SaaS platform supporting secure data management across organizations.
 - Implemented role-based access control, tenant onboarding, workflow automation, and customizable dashboards to enhance usability and scalability.
 - Built features for scheduling, alert management, and machine learning lifecycle management to streamline business operations.
- **Healthcare Management System | ReactJS, NodeJS, MySQL**
 - Enhanced a comprehensive healthcare platform with role-based access for administrators, hospital owners, doctors, and patients.
 - Designed an intuitive owner dashboard displaying key hospital metrics, staff management, and revenue analytics.
 - Implemented secure authentication with role-based access control for 4 different user types (admin, owner, doctor, patient).
 - Built scalable backend using Node.js and MySQL, ensuring efficient data management and quick response times
- **Home Service Application | React Native, NodeJS, MySQL**
 - Developed a mobile app for on-demand home services like cleaning, electrical, plumbing, and appliance repair.
 - Implemented category-based service filtering, allowing users to browse and choose services easily.
 - Designed a service provider listing screen with ratings, pricing, and service details for better user decision-making.
 - Integrated booking and scheduling features, enabling users to request, reschedule, and track service appointments.
- **Patient Registration System| Django**
 - Enhanced a web application for managing patient records with CRUD functionality (Create, Read, Update, Delete).
 - Implemented a user-friendly patient registration form with validation to capture patient details.
 - Established a dynamic menu to navigate between the patient creation, update, and delete operations seamlessly.
 - Built a patient search functionality for quick access to existing records.

TECHNICAL SKILLS

- Languages: Python, Javascript
- Full Stack Development : HTML, CSS, Javascript, NodeJS , React JS, React Native
- Database: MySQL, AWS S3
- Cloud: Azure, AWS
- Testing Tool: Jmeter , Postman
- Developer Tools: VS Code, GitHub
